

WAS THROWN FROM BUGGY TO HIS DEATH

FATHER OF LOUIS GAGNE HAS
NECK BROKEN IN ACCI-
DENTAL MANNER

The following article is taken from the Reno Journal of yesterday and gives an account of how N. Gagne, father of Louis Gagne of this city, met his death Tuesday. Louis Gagne left yesterday morning for Fallon to be present at the funeral of his father. The article follows:

FALLON, Dec. 20.—Within two miles of the lonely homestead on which he had toiled for years in order to convert it into a paying farm, N. Gagne was thrown out of a buggy this evening and instantly killed.

The accident happened so quickly that the only witness is unable to explain how it came about, but so far as can be learned, the details were as follows:

After spending the day in town marketing, Gagne entered his single rig and drove rapidly home in an endeavor to arrive at the homestead while it was yet light. He came upon a large freight team on the highway and the freighter turned partly out while Gagne turned to his side. Whether the speed was so great that he miscalculated or whether the horse swung in suddenly is unknown, but Gagne's horse collided with the leaders and was sent into the fence. A large post suddenly stopped the rig and Gagne was hurled through the air with frightful force. His neck was broken by the fall and he was dead when picked up.

Gagne leaves a wife, who went with him into the desert to try to make a home on the reclamation project.

UNITED STATES SECOND IN NAVAL STRENGTH

The United States closes another year in second place among the naval powers of the world. The great navy-building race between Germany and Great Britain has not brought the former country up to the United States in the number of battleships afloat, but in the ships projected and in the total number of war vessels of all kinds Germany will crowd the United States to the third place.

These facts are shown in the new navy year book by Pittman Pulsifer, clerk of the senate committee on naval affairs, and soon to be issued by the government printing office. In armored cruisers, although the technical division made in the United States indicates Germany to have more than this country, the actual strength of the United States exceeds that of its European rival. The compilations of Mr. Pulsifer show the world powers to rank as follows as to completed ships:

	Total	Large
	Ships	Tonnage
Great Britain	472	1,859,168 288
United States	152	717,702 136
Germany	209	666,035 100
France	403	556,306 57
Japan	169	413,291 60
Russia	201	284,113 30
Italy	114	219,956 20

In ships completed, building and provided for by various countries, Germany's number rises to 255, with a displacement of 963,954 tons, while the United States has 177, with a displacement of 878,152 tons.

At present the floating navies of the leading powers have Dreadnaught type vessels as follows:

England 11, with displacement of 203,100 tons.
United States 4, with displacement of 72,000 tons.
Germany 4, with displacement of 72,000 tons.

The year book shows that when vessels now being constructed and those for which funds have been provided are completed, the Dreadnaught strength of the three countries will be:

England 27, with displacement of 658,000 tons.
Germany 17, with displacement of 257,000 tons.
United States 10, with displacement of 221,650 tons.

ORE AGAIN FOUND IN MONTGOMERY-SHOSHONE

An uncovering of ore within the week has added perhaps sixty days to the life of the Montgomery-Shoshone as a producer. The famous "glory hole," which has yielded thousands of tons of commercial ore, has sprung another surprise by

suddenly showing up additional ore in quantity.

A big explosion of giant powder, set off the middle of the week, brought down a large quantity of good ore at the westerly end of the big pit, the ore thus broken and exposed being sufficient for perhaps a two months' run.

This uncovering may lead to further ore exposures, and there is no telling at this time what the life of the property may be. The mill is working as usual, and the operations for the last three months have shown a profit with a very low cost for mining and milling—the lowest of any gold-silver mine in the state. If Shoshone should come into its own once more, with a large body of medium or high grade ore, it would shortly redeem itself, for the operating expense is so low that a big profit may be made on anything like a fair grade of ore.

It has been talked on the streets this week that a big body of very rich ore had been opened, but there is no confirmation of this story.

The official report for September shows a profit of \$4,790.51 out of a gross production of \$25,019.82.—Rhyolite Herald.

KING SOLOMON MINE TO INSTALL HOISTING PLANT

MACHINERY IS ORDERED AND
WILL BE INSTALLED AFTER
FIRST OF YEAR

C. K. Jarvis, who is operating the King Solomon Mining company property twenty miles northwest of Millers, is in town and will remain here during the holidays. Mr. Jarvis stated this morning that a 20-horsepower hoist had been ordered for his property and would soon be installed. A new vein has been opened up at a depth of 100 feet and an excellent grade of shipping ore is being extracted. A carload of this is now on the dump of which about five tons are sacked. With the installation of the hoist it will only be a matter of time before regular shipments will be made. The property is but 20 miles from the railroad and a good road will make the transportation of ore an easy matter.

Three other properties in the King Solomon district will start operations after the first of the year. One of the holdings, owned by Goldfield people, now have shipping ore in sight and will be able to make a shipment before long.

EISEN IS SUED AS GUARANTOR

The Nevada-California Power company has brought suit against A. C. Eisen to recover the sum of \$3,353.95, together with interest and attorney fees. West and Potter are attorneys for the plaintiff. The complaint alleges three separate causes of action, all growing out of guarantees made by Eisen and W. A. Staunton, in relation to the operation of mining companies which purchased supplies from the power company. The first cause of action is one accruing to the company on the guarantee of Eisen and Staunton to pay a judgment against the Little Florence Mining company the amount due on which is \$609.05.

For a second cause the complaint alleges that the defendant guaranteed the payment of a judgment, obtained upon a note of James E. Keelyn and the Nevada Mine Owners' association, amounting to \$1,217.90. The last cause of action is upon a similar transaction of later date and involves the same amount of money.

An order of publication for the service of the summons and a writ of attachment have been issued in the case.—Goldfield News.

MAKE GOOD!

"Wake up, cull," says the burglar, shaking the man by the shoulder.

The man wakes up, and jumps up, too.

"I went troo dis house las' week an' got \$100 an' a bum gold time-piece," explained the burglar, "an' de papers said dat you said your loss was \$100 an' joolry to de amount o' five or six hundred."

"Ye-yes?"

"Well, make good, sport. Me pardner dat was watchin' on de outside made me cough up de difference between what I got an' what you said I got. Now you got to make good. You can't beat me dat way."—Judge's Library.

SAND SPRINGS HAS A RIGHT NEW GOLD DISCOVERY

GOOD PANNINGS FROM LEDGE
NEAR OASIS STARTS MEN
OUT IN BIG HURRY

News of an extremely rich gold strike near Sand Springs reached Wonder Thursday evening, and on Friday morning several prospectors were to be seen gathering up burros, getting camp materials together and making hurried preparations for moving. One outfit of a wagon drawn by two mules and piloted by B. B. Shepard, was the first to get away, and it was soon followed by a pack train of burros.

J. W. Phelps, the liveryman, who had been to Fallon on business, brought in the news of the find. While Mr. Phelps, who was in a hurry to get home, and did not stop for particulars, could not give all the details of the find, he says he saw a panning from the rock which gave a string of colors about as long as a man's finger.

The exact location of the place could not be ascertained, but is described as about half a mile south of the road, on the divide between Sand Springs and "the Frenchman's."

This section has been prospected a great deal, and a few years ago many locations were made in the vicinity. It is said that values have been found in many places, but never before has anything so rich as the present find been uncovered.—Wonder News.

BUSINESS AT WONDER IS PICKING UP

Some of the signs of increasing prosperity in Wonder, says the News, are the increasing demands for cabins, for men employed on the mill and other jobs, for sleeping accommodations, and new business ventures, present and prospective. Several saloons have been reopened after the long dry spell, a barber has come in with his razors and shears, ready to lather and shave all who have the beard and the price, and a butcher shop and green grocery dispensary about to be started. Louis H. Danberg and J. W. Hahn have fitted up the building at the corner of Main street and Broadway with butcher block, hooks, and the other things necessary for a meat carving establishment, and in a few days Mr. Hahn will be standing behind the counter in a white apron, with a smile on his face and a big knife in his hand, ready to greet customers and slice porterhouse steaks from any old part of a beef.

SON ARRIVES IN THE CONROY HOUSEHOLD

A baby boy arrived at the home of Mr. and Mrs. Maurice Conroy this morning and as a result there is cause for jubilation in that household. Mr. Conroy is employed at the Extension. Dr. J. R. Cunningham, who was the attending physician, reports both mother and child progressing nicely.

YOUNG GIRL WILL

WALK ACROSS CONTINENT

Miss Mildred Belknap, a 14-year-old sophomore of the Dorchester high school, announces that she will attempt to walk across the continent.

She expects to take several long tramps during the next few months so that by next spring she will be accustomed to them. She expects to cover forty miles a day.

She tramped to providence several days ago, making the forty-four mile jaunt without apparent fatigue and covering a route which she had walked once before. She was accompanied by her father, Charles F. Belknap, who is a post-office employee.

With her father Miss Belknap made an extended trip on foot in the White mountains last spring.
